

Благодаря случайности мы, ученики гимназии Солдино, попали в GLOBE, узнав о лагере в г. Силламяэ, так с 2004 года мы в проекте. Лагеря в Силламяэ, на Сааремаа, в Нарва – Йыссуу оставили очень хорошее впечатление. Общение с учениками, коллегами Эстонии, возможность, действительно, интегрироваться. Каждое пребывание в лагере даёт новую информацию, новые знания. Ежедневные наблюдения приучают учеников к ответственности, развивают интерес к природе, воспитывают бережное отношение к природе. Мы очень тронуты вниманием к нам, наличием обратной связи в виде писем благодарности. Это осознание того, что наши наблюдения кому-то нужны, придаёт большую значимость этого проекта. Мы благодарны руководителям проекта, гордимся тем, что в нём участвуем.

Алевтина. Бобылёва,
Narva Soldino Gümnaasium

Thanks to a lucky chance the pupils of the Soldino Gymnasium, having heard about a GLOBE camp in Sillamäe, joined GLOBE in 2004. Camps in Sillamäe, Saaremaa and Narva-Jõesuu gave us an extremely good impression. Relating with other pupils and colleagues in Estonia offers good opportunities for integration. Each meeting at the summer camps gives new information and new knowledge. Daily involvement in observations teaches the pupils responsibility, shapes their interest in nature, and develops sustainable attitude towards nature. We are very grateful that our work has been appreciated, we have received letters of thanks, indicating that our observations and work are useful; this shows us the importance of the project. We wish to thank the supervisors of the project and we are proud to participate in it.

A. Bobyljeva,
Narva Soldino Gymnasium

The GLOBE Program

*Global Learning and Observations to Benefit the Environment
An International Environmental Science and Education Program*

October 22, 2007

Alevtina Boboljova
Narva Soldino Gymnaasium
Tallinna Mnt. 40
Narva, 21001
Estonia

Dear Alevtina Boboljova:

Congratulations! In the October 2007 determination of the GLOBE Chief Scientist's Honor Roll, Narva Soldino Gymnaasium has made the Honor Roll in the following categories:

Clouds for the four-month period ending in September 2007

This Honor Roll citation recognizes you and your students for providing measurements of your environment in a way that is particularly helpful for research. On behalf of the GLOBE scientists, the Earth science community, and all who participate in GLOBE, I thank you.

Since taking your first observations on February 25, 2005, Narva Soldino Gymnaasium has reported data from 3890 student measurements. Data have been reported at a rate of 124 measurements per month.

Data reporting is a key contribution to GLOBE. It provides the scientists with what they need for their research; it gives students information to use in their studies; and it indicates to all the continuing success of GLOBE. I look forward to writing you in the future as you continue your contributions to this Program.

Sincerely,

Dr. Margaret (Peggy) LeMone
Chief Scientist
